COLLECTIVE™

Marine Collagen & Elastin oligopeptides

Skin anti-ageing & Hydration

COLLECTIVE™ is composed of collagen and elastin oligopeptides in the same ratio as in the dermis (respectively 94% and 6% of the total proteins).

COLLECTIVE™ combines the two main constituents of the extracellular matrix and has an anti-wrinkle synergic action: elastin fibres give the dermis suppleness that completes collagen fibres tensile strength.

COLLECTIVE™ oligopeptides have a low molecular weight, making them soluble in aqueous phase and fully digestible. COLLECTIVE™ is ideal for nutricosmetics.

- PROPERTIES -

• COLLECTIVE™ REINFORCES SKIN HYDRATION

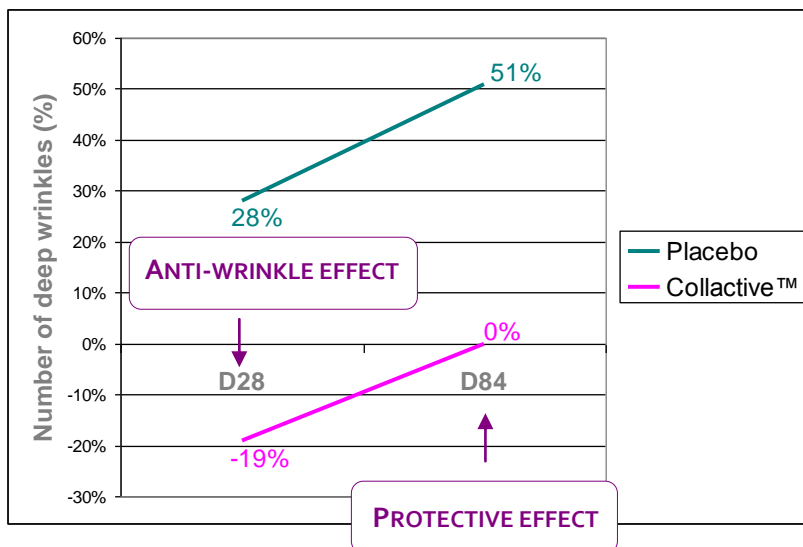

The moisturizing effect of COLLECTIVE™ is supported by a clinical study involving 44 women over 40 years old. The results show an increase of the entire epidermis hydration (+8%) after oral administration of COLLECTIVE™ for 3 months.

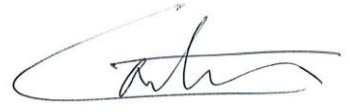

• COLLECTIVE™ HELPS MATURE SKIN BUILD LIFT AND FIRING CUSHION

COLLECTIVE™ collagen and elastin oligopeptides stimulate the biosynthesis of dermis main constituents to lift and tone slacking areas.

COLLECTIVE™ minimizes apparent lines and wrinkles as per the results of the clinical study (see graph).

On D84, the skin was exposed to cold temperatures, which explain the weaker anti-wrinkle effect at this period. The results highlight the protective effect of COLLECTIVE™ against the harsh conditions in winter.

• **COLLECTIVE™ IS A POTENT ANTIOXIDANT TO FIGHT AGAINST FREE RADICALS**

COLLECTIVE™ has a full anti-ageing action with potent antioxidant properties: the structural constituents of the dermis are thus protected against environmental damage. COLLECTIVE™ antioxidant activity was also substantiated by **ORAC test**.

⇒ **COLLECTIVE™ delays skin ageing process by protecting the skin and stimulating its main structural constituents.**
